DISCOVER THE NEXT GENERATION OF THE CRYO:ONE+

INNOVATIVE CRYOTECHNOLOGY
PRESENTED BY MECOTEC

MECOTEC's cold chambers for

WELLNESS, SPORT, AND LIFESTYLE

With an electric cold chamber from MECOTEC, you're choosing a refrigeration technology that sets new standards.

Responsible
Safer, gentler, and more effective – without the use of liquid nitrogen.

Advanced
MECOTEC has been the market leader and pioneer in refrigeration technology for over 25 years.

Economical
Through years of research, we ensure low operating costs, high quality, and exceptional profitability.

Reliable & Durable
Our products are made in Germany, and our service is available worldwide – with warranty options for as long as 6 years.

The new cryo:one series for more performance and individuality

Our single-chamber systems offer freedom of movement and practicality without the need for nitrogen. The cryo:one is designed for private use, while the cryo:one+ is suitable for commercial purposes. The compact design of both chambers allows for easy, one-day insulation. With the circulation of deeply cold air, reaching temperatures of up to -85°C, the body is stimulated and revitalized within minutes.

Additional Options:

1. Recooler
2. Music package
3. Wooden cabinet
4. MECOTEC Smart Control App

cryo:one

- Up to -85°C
- 1 person per session
- Up to 25 sessions per day

Recommended for private use

- Suitable for nearly any installation
- Minimal operating costs

cryo:one+

- Up to -85°C
- Up to 2 persons per session
- Up to 100 sessions per day

Recommended for commercial use

- Even more efficient cooling
- More power and space

*Dimensions excluding machine or machine cabinet

Customized Lighting

The LED lighting offers a personalized lighting experience for each application.

Individual Design

Individual color schemes for the exterior provides a perfect fit of the chamber in all surroundings.

Efficiency

Shorter cooling times offer increase in efficiency.

Self-Operating

The use of preset programs allows the operator to have more time and resources to focus on other activities.

Safety Alert

The system emits an alarm signal if the user does not leave the chamber after the application.

Transparency

The number of applications and notifications are logged and sent as a daily report to the operator.

Custom Programs

Three predefined programs offer individual cold applications, while manual adjustment allows for personalized options.

The MECOTEC All-Inclusive Package

FINANCING/LEASING

We collaborate with partners who offer worry-free financing options.

SERVICE CONTRACT

A service contract for our cold chamber systems ensures comprehensive support, from phone assistance to extended warranties and on-site service. This ensures the reliability of your systems.

- ❄Annual maintenance, including phone support
- ❄Remote service by our qualified service team
- ❄Regular software updates
- ❄Remote control of the cold chamber via the MECOTEC Smart Control App
- ❄Extended warranty for up to 6 years

Feel free to reach out to us for further information.

TRUST THE ORIGINAL

MECOTEC is a pioneer in the development of electric refrigeration technology and draws on over 25 years of experience. When you choose cold chambers from MECOTEC, you opt for standard-setting TÜV-certified technology, 100% made in Germany.

From research and development to manufacturing and distribution, to customer service, we work closely together with you to develop the best ideas and offer you the best products.

With our two locations for development, production, and logistics in Germany and our worldwide branches, we serve the needs of our customers worldwide.
